CLIENTS' TESTIMONIALS & AWARDS

Carl-Fredrik Linné 🇸🇪

CTO, Cure Media

The solutions they're providing is helping our business run more smoothly. We've been able to make quick developments, meeting our product vision within the timeline we set up. Listen to them because they can give strong advice about how to build good products.

- #netcore
- #angular
- #ci/cd
- #microservices

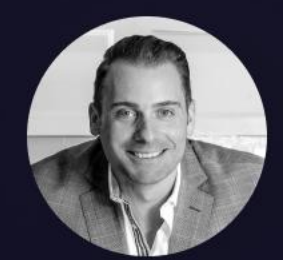

Vadim Ivanenko 🇺🇸

COO, Ophtherium

Great job! We met the deadlines and brought happiness to our customers. Communication was perfect. Quick response. No problems with anything during the project. Their experienced team and perfect communication offer the best mix of quality and rates.

- #java
- #python
- #cloud
- #cross-systemintegrations

Daniel Bertuccio 🇦🇺

Marketing Manager, Eurolinx

Their level of understanding, detail, and work ethic was great. We had 2 designers, 2 developers, PM and QA specialist. I am extremely satisfied with the end deliverables. Devox Software was always on time during the process.

- #php
- #jquery
- #sql
- #sapintegration

Tamas Pataky 🇨🇦

Head of Product, Stromcore

Their intuition about the product and willingness to try new approaches and show them to our team as alternatives to our set course were impressive. The Devox team makes it incredibly easy to work with, and their ability to manage our team and set expectations was outstanding.

- #python
- #angular
- #docker
- #gitlab

OUR PROJECTS / FERRETLY

Frontend

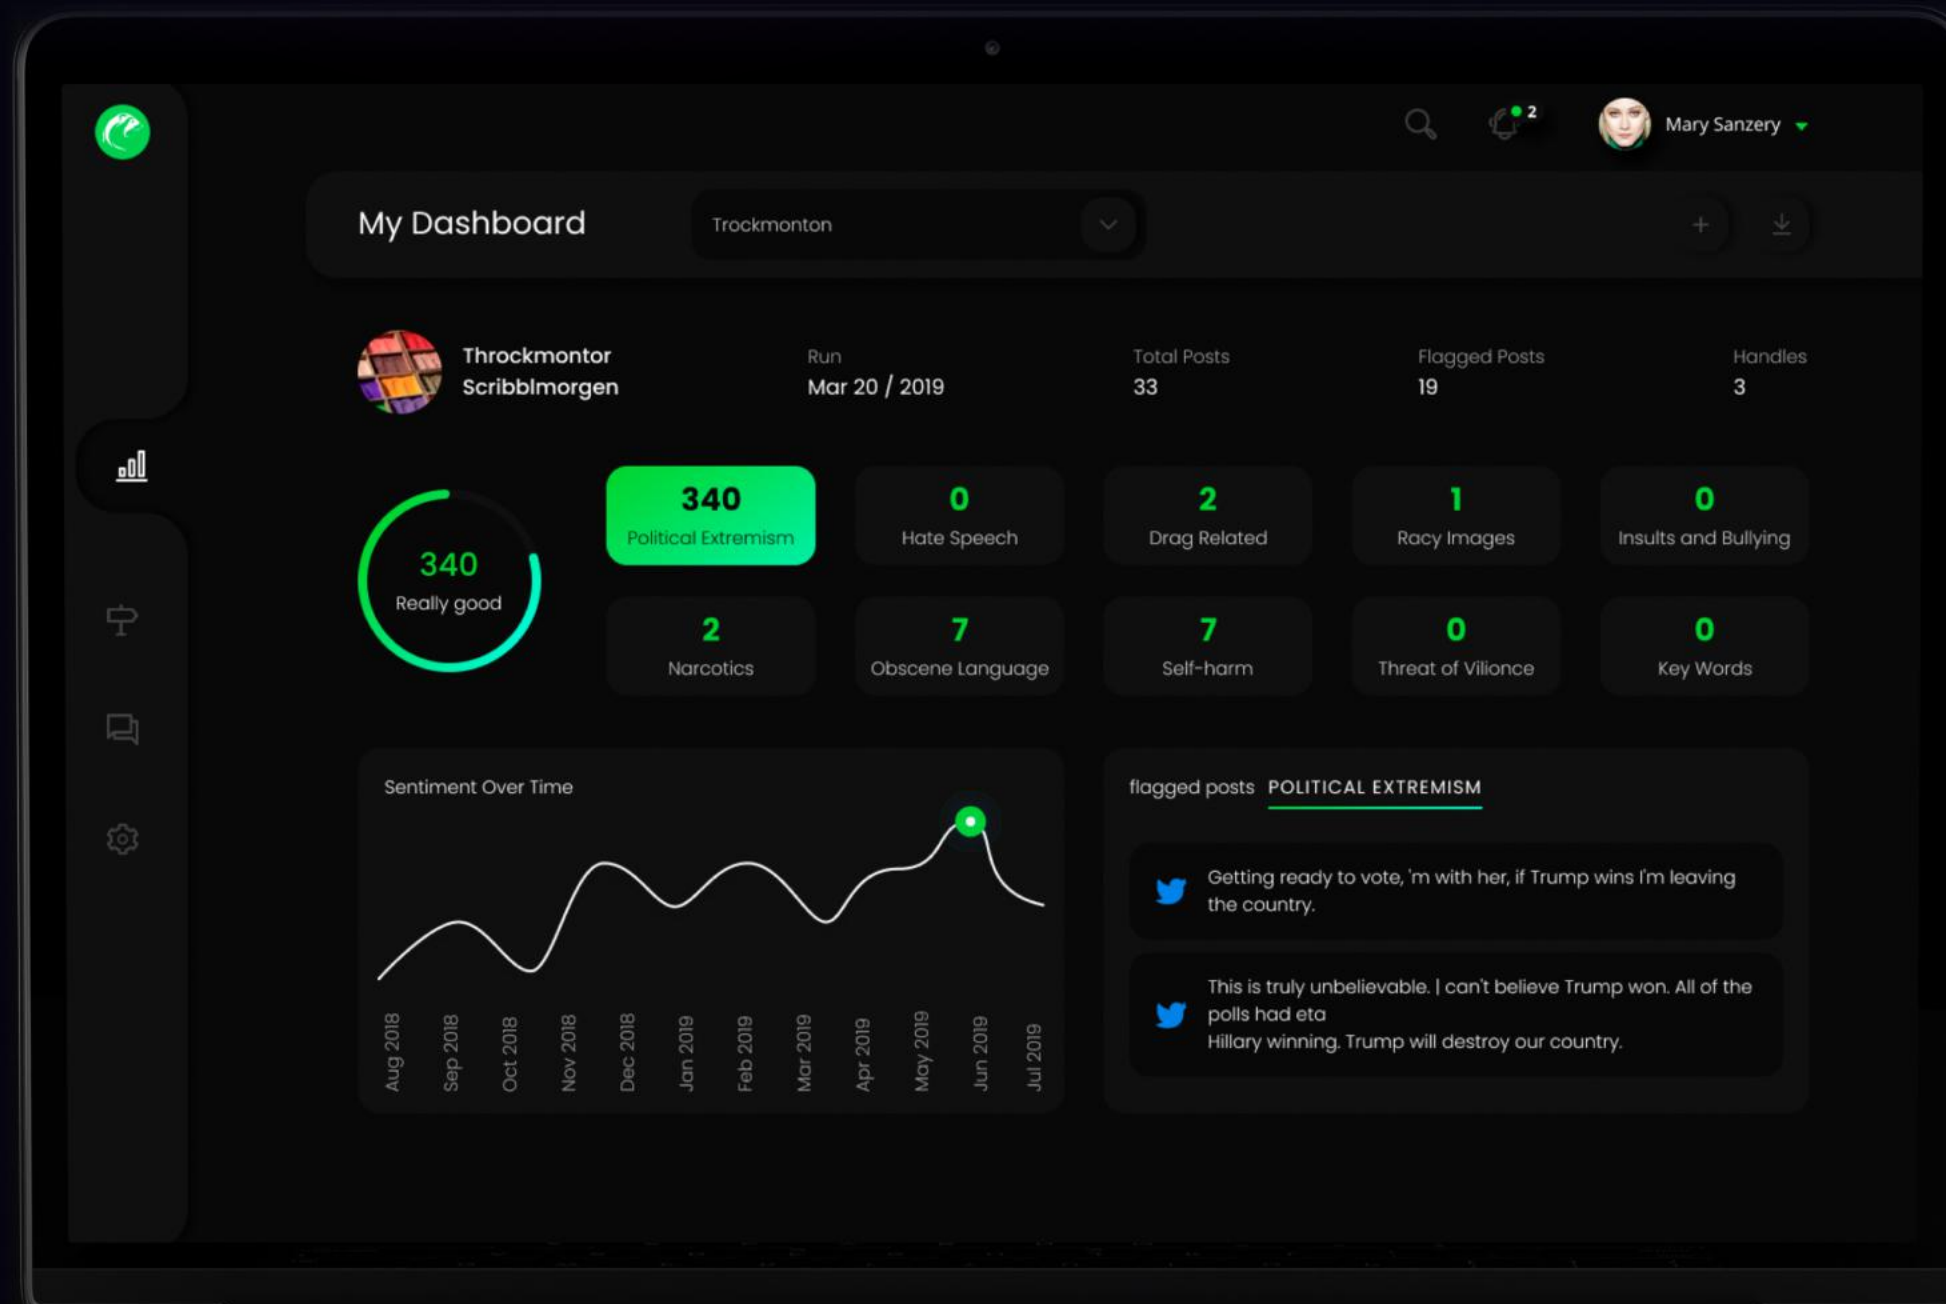

Backend

DevOps

QA

Technologies: Angular, JavaScript, .NET Core, Azure, Kubernetes, Docker, Selenium

Cooperation model: Time & Material

Since 2018, we've been developing a social media background screening SAAS platform – Ferretly.

Our way on the project started on the Proof-of-Concept stage, when the previous vendor said that the idea of the platform couldn't be implemented from the tech standpoint. Nowadays, having a running platform with satisfied active users, we have proven that it could be.

The platform is implemented using cutting-edge technologies - Machine Learning, NLP, AI, Auto-scale Cloud Server Infrastructure.

in

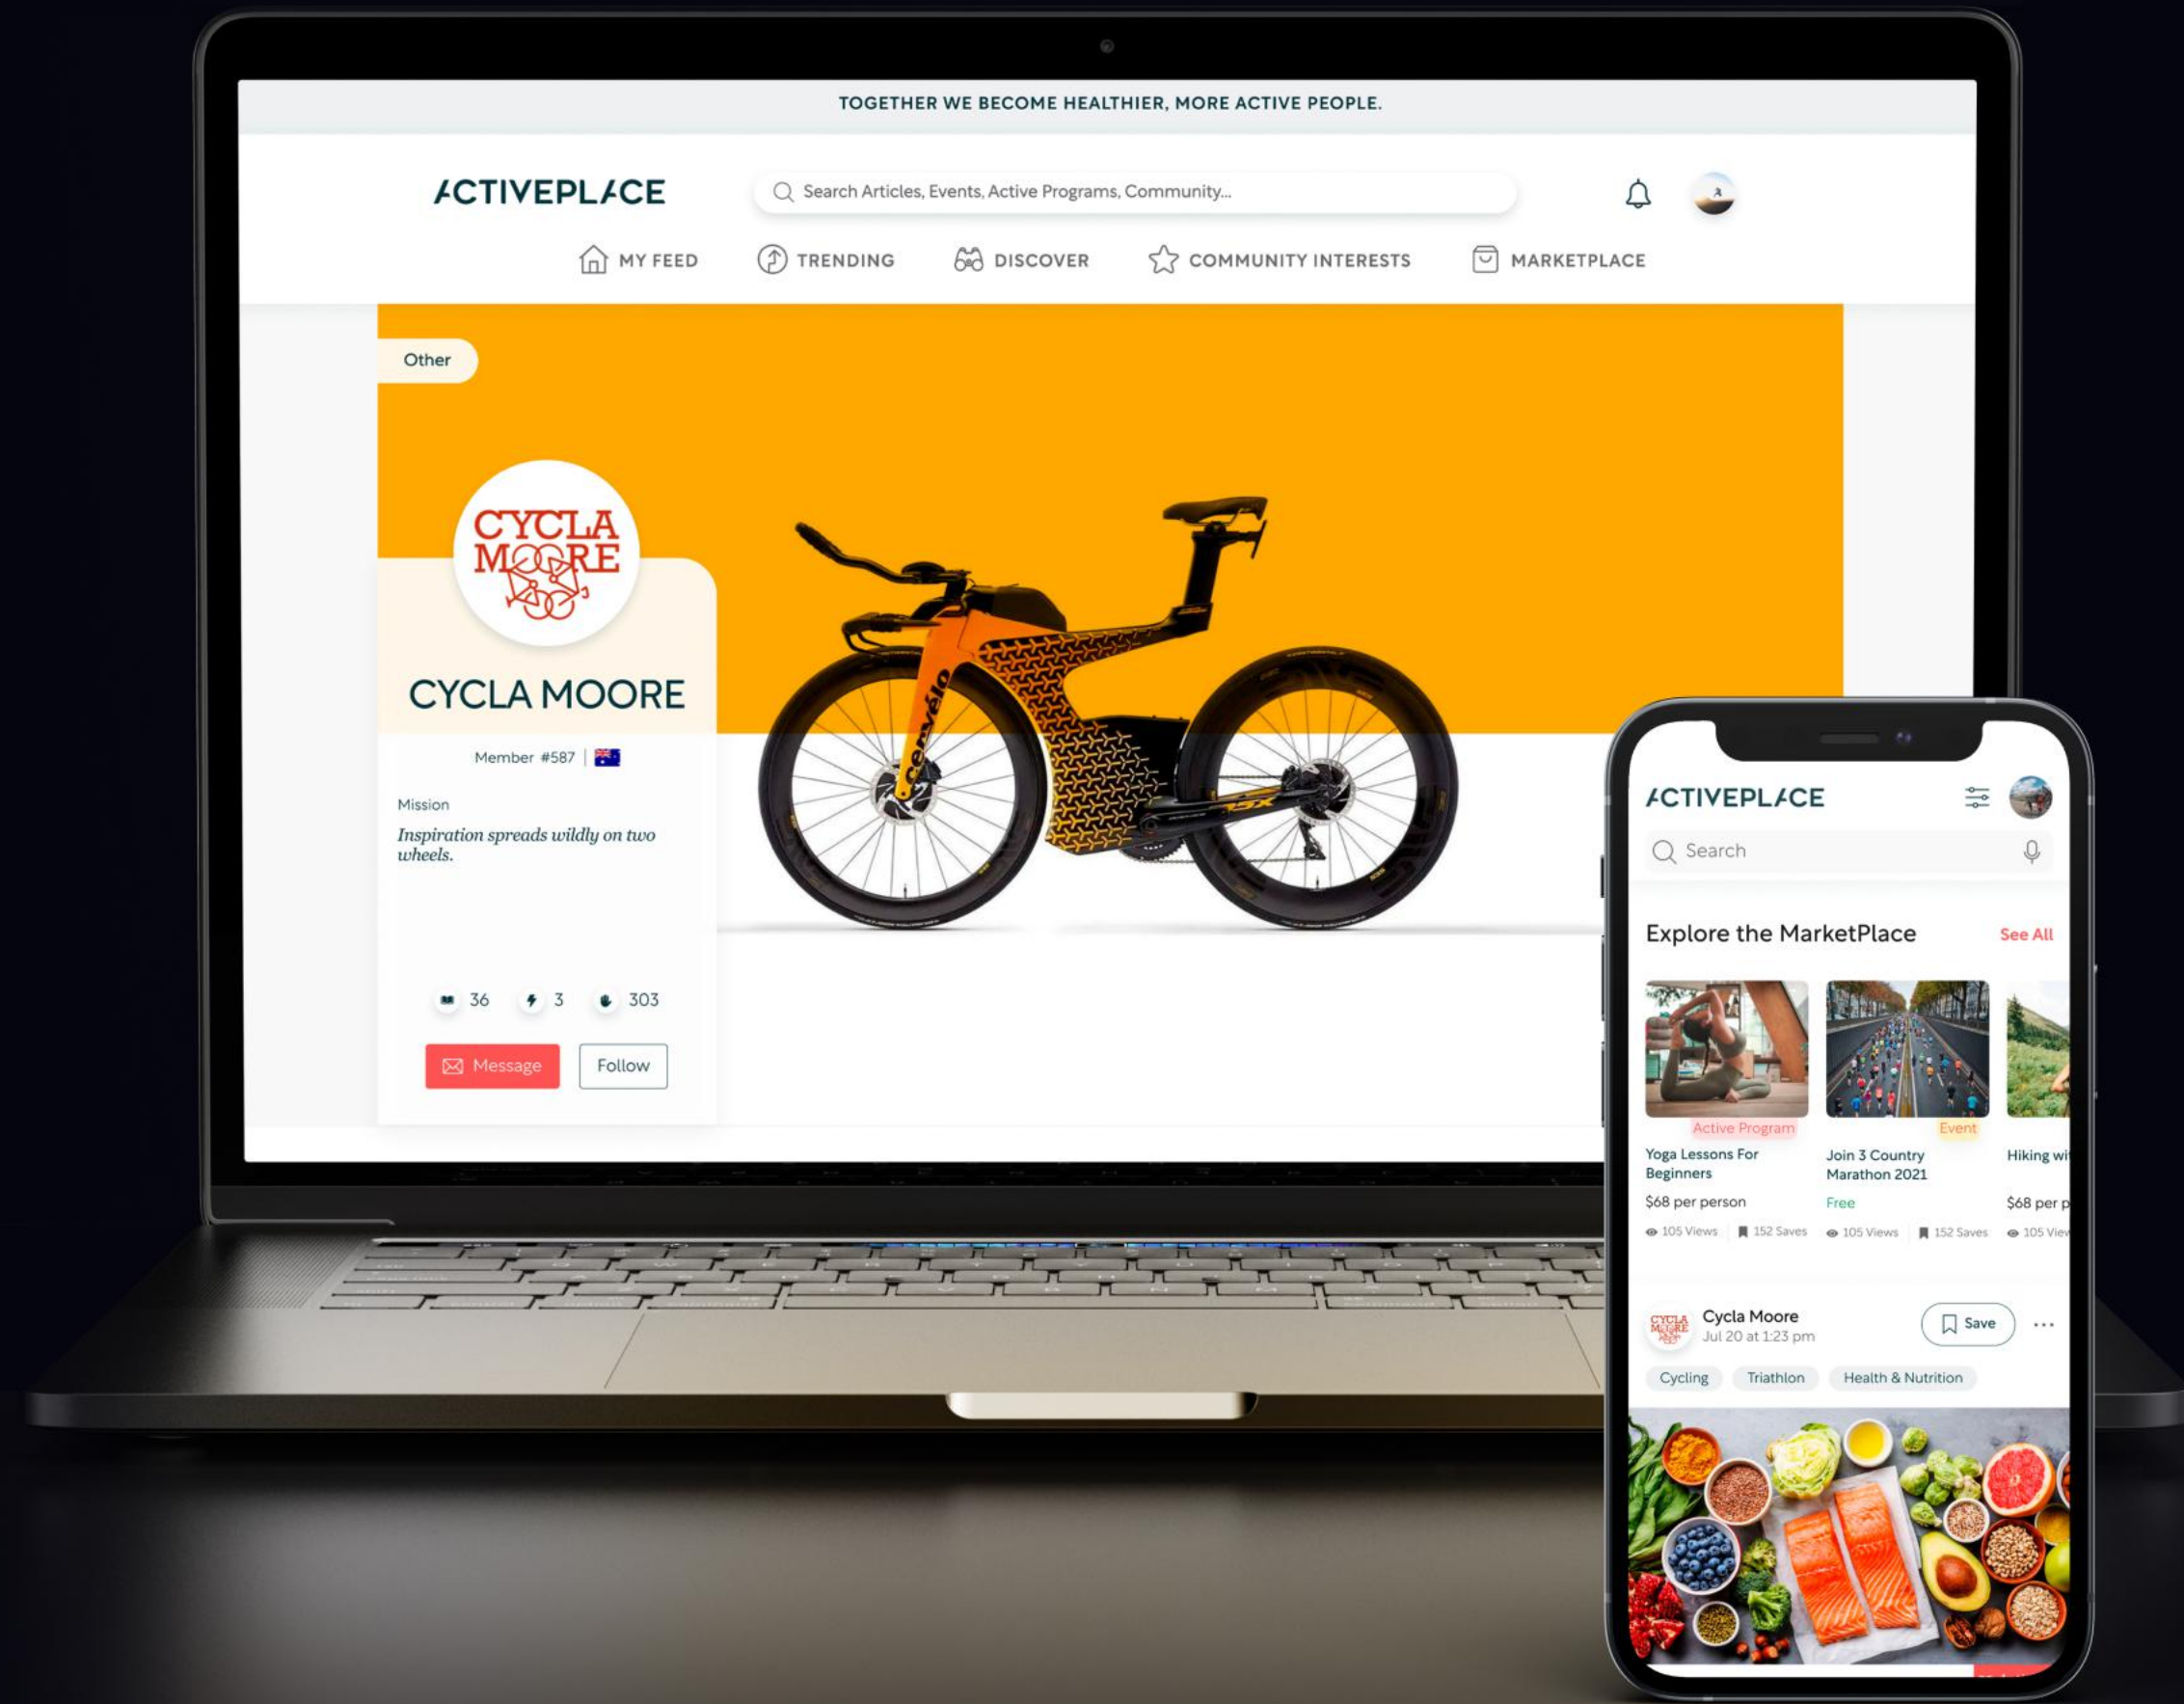

Technologies: Vue.js, Node.js, Azure, Kubernetes, Docker, Selenium

Cooperation model: Dedicated Team

The client approached us to build a social platform dedicated to health, fitness, and an active lifestyle. The main goal was to build a unique project from scratch as the first solution of its kind.

Challenged by the unique project idea, the team managed to design and build the software product from scratch. Currently, ActivePlace is available in three versions, including web and desktop applications as well as mobile apps for iOS and Android. The platform is used by thousands of users, mentors, and businesses that contribute to the healthier future of nations worldwide.

Cooperation model: Time & Material

F4 Events is a USA-based professional event ecosystem hosting 100K+ events that offers a simple, user-friendly discovery venue for the financial services sector. The enterprise event management software features a single, real-time dashboard with zero setup for event attendees, hosts, and sponsors.

Devox Software worked on the transformation of the existing former ticket selling solution into the ultimate event organizing planning and management system. The platform allows to make data-driven event decisions providing easy-to-use multifunctional dashboards for event attendees, sponsors and hosts.

OUR PROJECTS / NABED

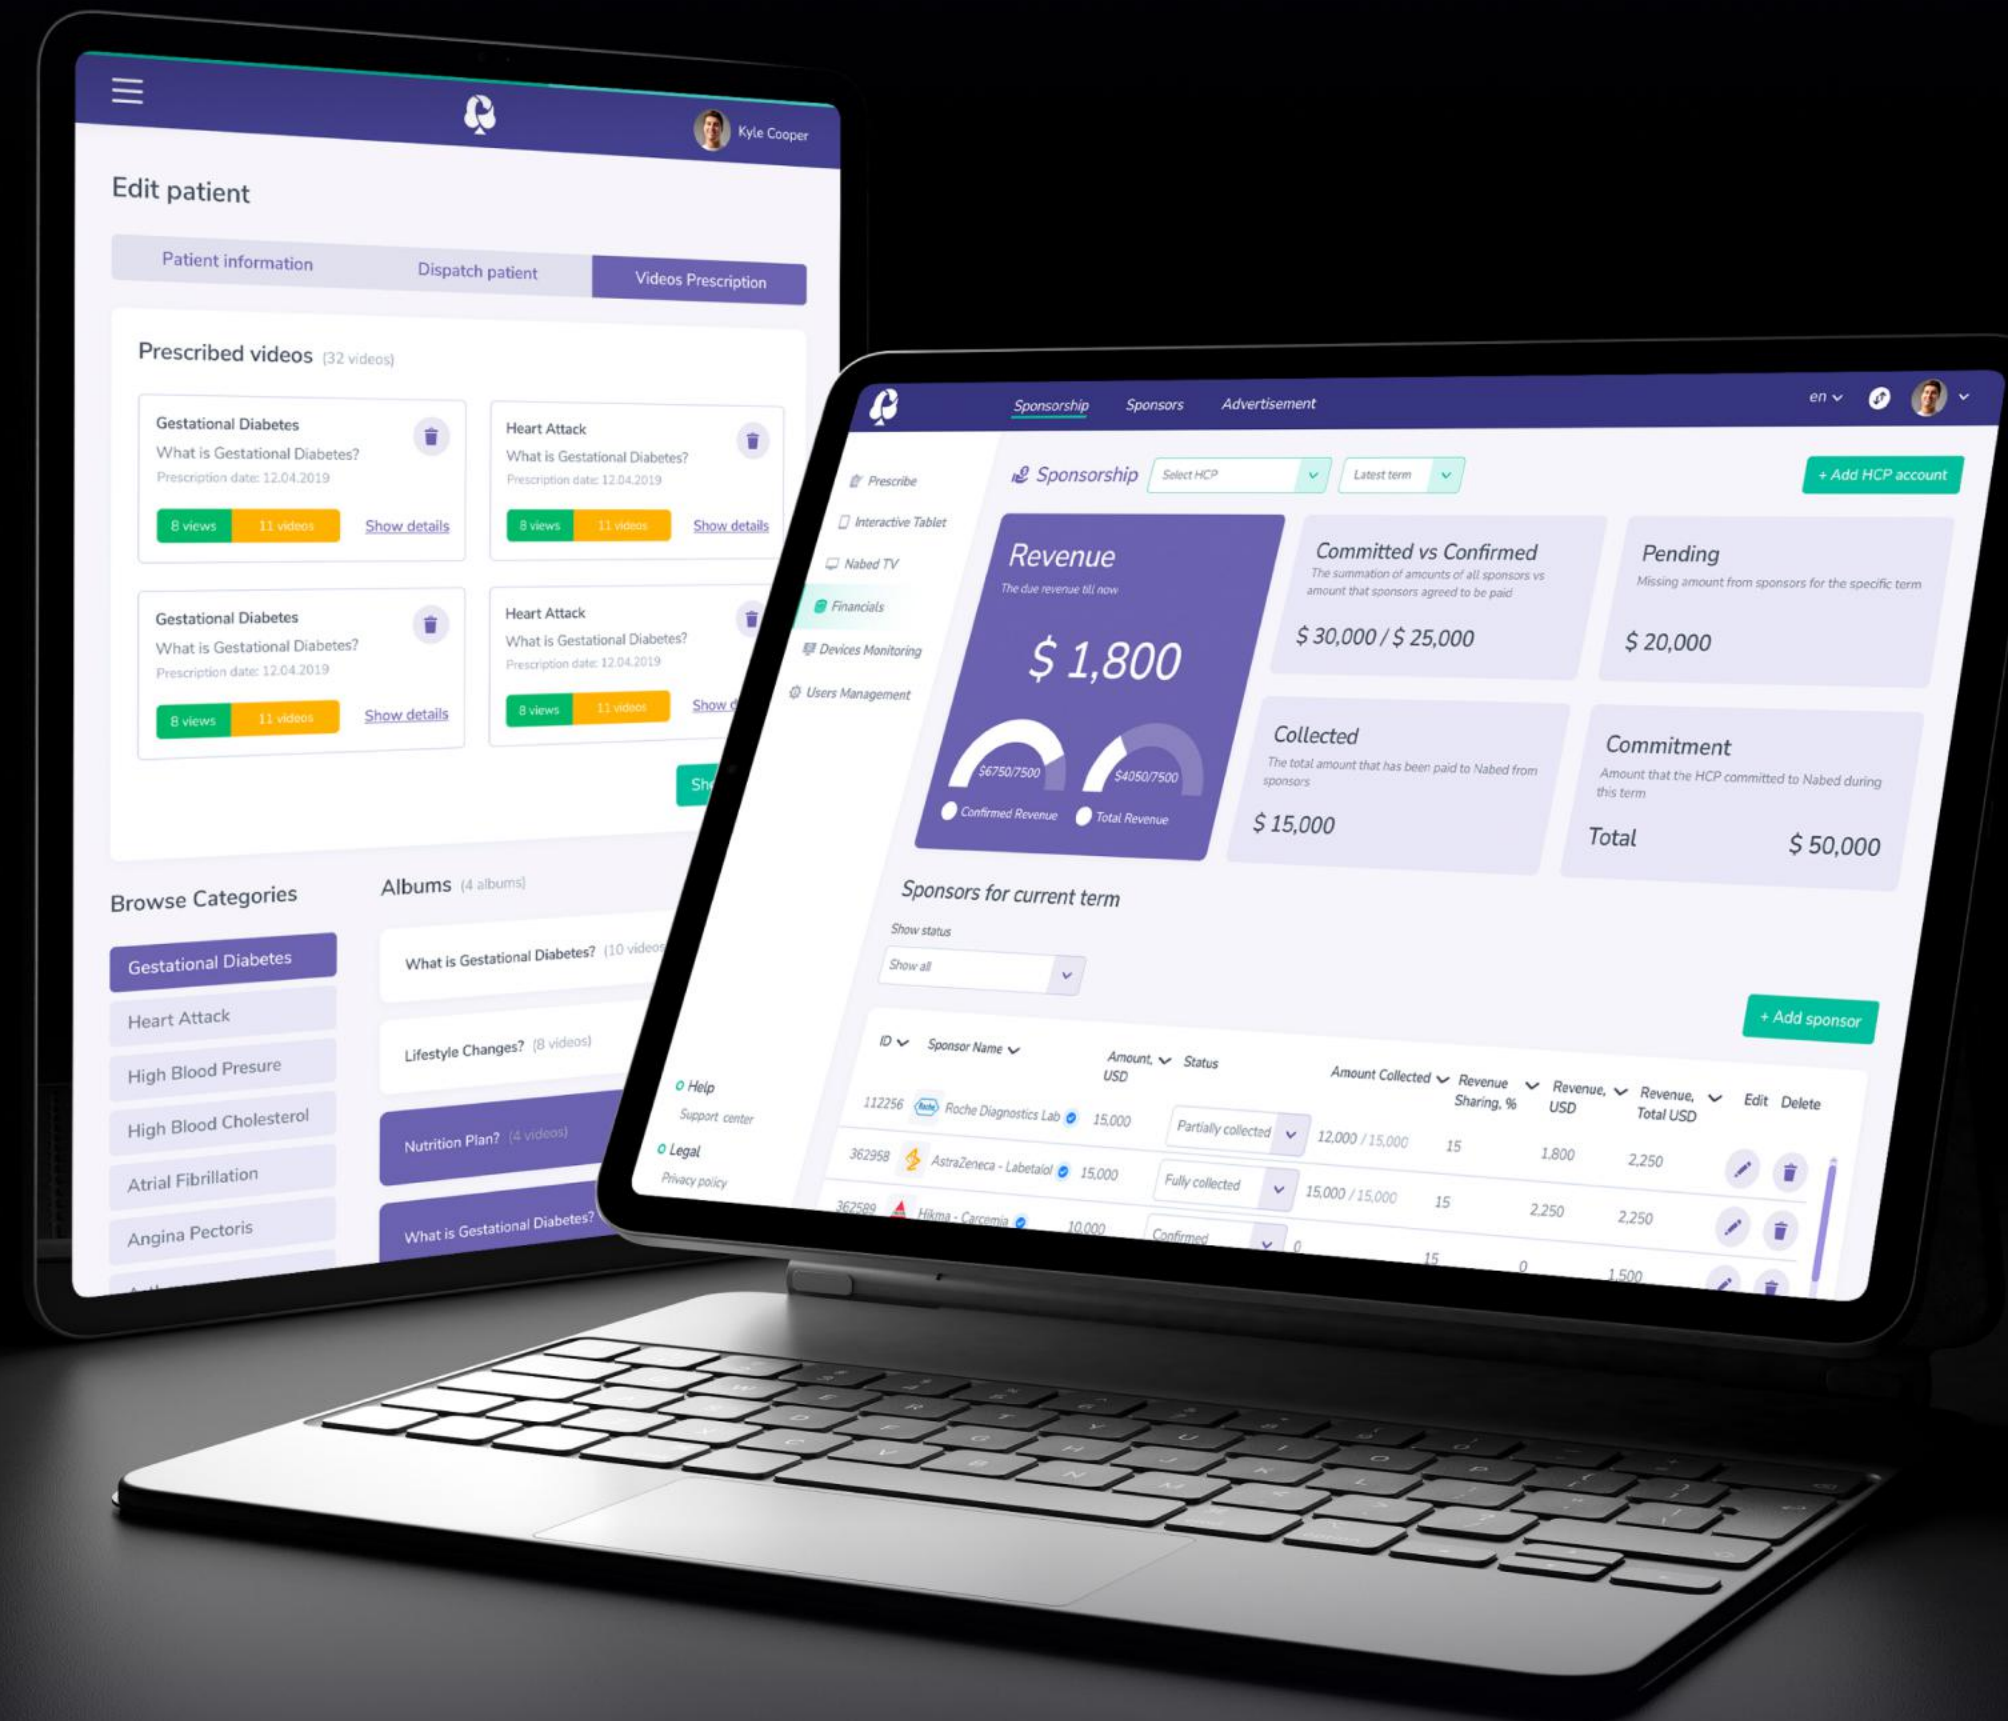

Technologies: Angular, .NET Core, Docker, AWS

Cooperation model: Fix Bid

This MedTech project was created for clinics, hospitals, and their clients. Clinics may provide their content to clients and advertise their services while clients get health education via articles and videos.

Devon Software was responsible for creating user experience and user interface for web and tablet applications as well as developing the platform. Since the project was long-lasting, the client decided to hire a dedicated team. We created our library to take its components for the projects. In total, the design team created more than 100 screens while the development process took about 6 months.
