DEVOX SOFTWARE

We Fix, Transform, and Skyrocket Your Software

https://devoxsoftware.com/

ABOUT DEVOX SOFTWARE

Devox Software is an international technology company specializing in software development and consulting services. Since our founding in 2018, our primary goal has been to bring excellence to your organization, enabling you to focus on growing your business. We value common sense and honesty, along with a constant drive for improvement — principles we bring to every collaboration.

LEGACY REPLATFORMING

LEGACY MODERNIZATION

AI-driven audits, automated refactoring, and governed rollouts shave up to 30% from release timelines while strengthening security and compliance from day one.

PRODUCT ENGINEERING

Cross-functional squads turn ideas into scalable SaaS and mobile products. You get enduring code and a roadmap backed by 95% client satisfaction scores and partnerships that last more than five years.

AI & ML SOLUTIONS

Real-time predictive insights and tailored generative features embed intelligence throughout your product, enabling continuous learning, delighted users, and fresh revenue channels.

DEVSECOPS AUTOMATION

Event-driven CI/CD pipelines self-tune, detect configuration drift and roll back automatically. Builds run faster, incidents drop, and every change is traceable, all while humans remain firmly in control.

INTELLIGENT AUTOMATION

Self-improving code workflows, automated unit test generation, and KPI-driven feedback loops eliminate wasteful manual steps across the SDLC, enhancing velocity without increasing headcount.

AI-POWERED ANALYSIS

Our AI Solution Accelerator™ rapidly untangles complex legacy codebases, mapping hidden dependencies and auto-generating precise technical documentation. Cuts code audit time by up to 70%, accelerating modernization and reducing legacy-related risk.

HOW DEVOX SOFTWARE CAN HELP YOU

100% of Client tech capabilities have been increased

10/10 Clients scaled their tech teams as planned

$1B The total capitalization of our clients is more than $1 billion

100% of clients admitted the additional value of people management support

92% of clients felt budget saving

87% of startups gained ROI > 100%

01. STABLE LONG-TERM SUPPORT

02. SAVING YOUR MONEY

03. FAST PROJECT COMPLETION

04. ADDED TECHNICAL EXPERTISE

05. INCREASING THE ROI ON YOUR TECH EXPENDITURES

06. INCREASING YOUR FLEXIBILITY

OUR APPROACH

We fix what's broken. Build what matters.
And push tech where it actually makes a difference.

| 01 | 02 | 03 |

MODERNIZE

Fix what's slowing you down. Eliminate tech debt, stabilize operations, and bring outdated systems up to speed, without rewriting from scratch.

- Legacy Application Modernization
- Cloud Modernization Services
- DevOps Services
- Cybersecurity
- CTO as a Service
- UI/UX Redesign Services
- QA & Test Automation
- AI-Powered Software Refactoring

BUILD

Turn ideas into high-performance products. We design platforms that scale, adapt, and deliver measurable business impact.

- Custom Web Development
- Mobile App Development Services
- Front-End Development
- Back-End Engineering Services
- SaaS Development Services
- MVP & Proof of Concept
- Product Strategy
- Software Development Consulting

INNOVATE

Future-proof your core. We embed AI, IoT, and Web3 into your architecture to unlock new capabilities.

- AI & ML Development Services
- Web3 & Blockchain Solutions
- IoT Software Development
- Business Intelligence & Analytics
- Data Analytics Services
- AI Solution Accelerator™

WE CAN LEAD OR FOLLOW, DEPENDING ON YOUR NEEDS

We can support client-led projects, or take greater level of responsibility over the project, maximizing client value while retaining sufficient involvement.

CLIENT MANAGED

Define · Build · Operate · Manage

- Team augmentation
- Project already in flight
- Client has in-house expertise
- Client team has bandwidth
- Lower perceived risk
- Reduced economic benefit

DEVOX SOFTWARE MANAGED

Define · Build · Operate · Manage

- Project execution
- New initiative
- Less client involvement required
- No pressure on your in-house team
- Risk managed through visibility
- High economic benefit

INDUSTRIES WE SERVE

OUR LATEST PROJECTS

FINTECH

- Sub-second BNPL microservices
- AI-Powered Platform for Property Insurance
- VAT Filing & E-Invoicing Platform
- IRS 1040 Tax Filing Platform
- Trading System for Market Execution
- Web3 PaaS Ecosystem for NeoBanking

LOGISTICS

- AI-Powered Automation for Global Logistics
- AI-Powered TMS
- Bus Fleet Management System
- Freight Management Platform
- Car Fleet Management System
- Behavioral AI SDK for HDAS

MANUFACTURING

- Configurable Workflow Platform
- Automotive MES Platform
- AI Export Certification Engine
- Audit & Feedback QMS Platform
- Monitoring UI for PaaS Logistics

REAL ESTATE

- AI Platform for Real Estate Pricing
- Real Estate Maintenance Platform
- Immersive Portal with 360° Views

ADTECH & MARTECH

- Multi-Region Headless CMS
- Configurator-Driven E-Commerce Platform
- Multi-Account Platform for Global Marketers
- Franchise Website Builder
- Wellness-Focused Social Marketplace Platform
- Event Management Platform

HR & WORKFORCE

- Franchise Management Platform
- Platform for HR Software Providers
- Social Media Background Check Platform
- Project Management Platform
- Document Intelligence Engine

HOW DEVOX SOFTWARE COOPERATES

	FIXED BID	SOLUTION	DEDICATED TEAM
REQUIRED:	• Clear project requirements and determined deadlines	• Scope of work that might change or is hard to predict	• Full client involvement
BENEFITS:	• Predictability. A project has a fixed budget, cost and timelines • Transparency • Easy to manage	• Flexibility. Unit-price contracts allow businesses to modify the volume of work, revise materials or designs • Dynamic work scope. Project scope is not yet fully known • Better timing. Skips the fixed-price bidding process, saving time and allowing the project to start right away	• Access to global expertise and internal knowledge transfer • Predictable costs. Clients have a greater opportunity to meet their budget • Team size is easily scalable
DISADVANTAGES:	• Limited number of change requests	• Deep customer engagement	• You need to monitor the team's workload to keep this model effective

AI SOLUTION ACCELERATOR™

Meet our signature approach
Engineered to supercharge Your software journey

01

SYSTEM INTELLIGENCE FROM DAY ONE

Gain a full architectural snapshot before a single line of code is touched. AI reverse-engineers your system to uncover bottlenecks, tech debt, security gaps, and performance issues. This allows us to align priorities, scope, and risk from the very start.

02

AI-POWERED STRATEGIC PLANNING

Replace weeks of planning workshops with days of structured AI-driven insights. We auto-prioritize features, generate testable requirements, and create evidence-based roadmaps, tailored to your business goals and tech context.

AI SOLUTION ACCELERATOR™

Meet our signature approach
Engineered to supercharge Your software journey

03 — LEGACY REFACTORING WITH PRECISION

Modernize what matters — without breaking what works. Our AI models deconstruct complex codebases, generate safe refactoring plans, optimize data structures, and manage seamless deployment with rollback protection.

04 — ARCHITECTURE DESIGN REINVENTED

Make better structural decisions, backed by data and simulation. From architecture pattern discovery to threat modeling and load simulation, our AI tools support engineering teams with clarity, security, and future-proof planning.

05 — ACCELERATED MVP DELIVERY

Build faster, test smarter, and launch with confidence. We convert business hypotheses into working MVPs using AI-generated scaffolding, real-time coding support, and integrated test coverage from the first sprint.

AI SOLUTION ACCELERATOR™

Meet our signature approach
Engineered to supercharge Your software journey

06 SELF-IMPROVING CODE WORKFLOWS

Keep your team focused, while AI handles the noise. AI accelerates boilerplate code, detects code smells, generates unit tests, and tracks tech debt — all without disrupting developer flow.

07 ORCHESTRATED DEVOPS

From code to release and beyond.
We optimize CI/CD pipelines, monitor live environments, extract product insights, and keep your roadmap data-driven. Each release improves the next.

DEVOX SOFTWARE CLIENTS

Devox Software works with SMEs — SaaS, PaaS, and real businesses — across the USA, Canada, Australia, and Western Europe.
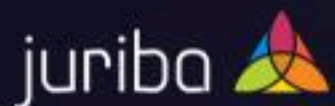

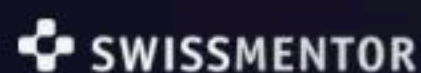

CLIENTS TESTIMONIALS & AWARDS

Carl-Fredrik Linné 🇸🇪
Tech Lead, Cure Media

★★★★★

The solutions they're providing is helping our business run more smoothly. We've been able to make quick developments, meeting our product vision within the timeline we set up. Listen to them because they can give strong advice about how to build good products.

#.netcore   #angular   #ci/cd   #microservices

Vadim Ivanenko 🇺🇸
COO, Optherium

★★★★★

Great job! We met the deadlines and brought happiness to our customers. Communication was perfect. Quick response. No problems with anything during the project. Their experienced team and perfect communication offer the best mix of quality and rates.

#java   #python   #cloud   #cross-systemintegrations

Daniel Bertuccio 🇦🇺
Marketing Manager, Eurolinx

★★★★★

Their level of understanding, detail, and work ethic was great. We had 2 designers, 2 developers, PM and QA specialist.
I am extremely satisfied with the end deliverables. Devox Software was always on time during the process.

#php   #jquery   #sql   #sapintegration

Tamas Pataky 🇨🇦
Head of Product, Stromcore

★★★★★

Their intuition about the product and willingness to try new approaches and show them to our team as alternatives to our set course were impressive. The Devox team makes it incredibly easy to work with, and their ability to manage our team and set expectations was outstanding.

QA

FERRETLY

Technologies: Angular, JavaScript, .NET Core, Azure, Kubernetes, Docker, Selenium

Cooperation model: Time & Material

Since 2018, we've been developing a social media background screening SAAS platform – Ferretly.

Our way on the project started on the Proof-of-Concept stage, when the previous vendor said that the idea of the platform couldn't be implemented from the tech standpoint. Nowadays, having a running platform with satisfied active users, we have proven that it could be.

The platform is implemented using cutting-edge technologies - Machine Learning, NLP, AI, Auto-scale Cloud Server Infrastructure.

OUR PROJECTS / ACTIVE PLACE

ACTIVEPLACE

Technologies: Vue.js, Node.js, Azure, Kubernetes, Docker, Selenium

Cooperation model: Dedicated Team

The client approached us to build a social platform dedicated to health, fitness, and an active lifestyle. The main goal was to build a unique project from scratch as the first solution of its kind.

Challenged by the unique project idea, the team managed to design and build the software product from scratch. Currently, ActivePlace is available in three versions, including web and desktop applications as well as mobile apps for iOS and Android. The platform is used by thousands of users, mentors, and businesses that contribute to the healthier future of nations worldwide.

OUR PROJECTS / FUNCTION4

f4 FUNCTION4

Technologies: Figma, Vue,js, Stripe, Bootstrap

Cooperation model: Time & Material

F4 Events is a USA-based professional event ecosystem hosting 100K+ events that offers a simple, user-friendly discovery venue for the financial services sector. The enterprise event management software features a single, real-time dashboard with zero setup for event attendees, hosts, and sponsors.

Devox Software worked on the transformation of the existing former ticket selling solution into the ultimate event organizing planning and management system. The platform allows to make data-driven event decisions providing easy-to-use multifunctional dashboards for event attendees, sponsors and hosts.

NABED

Technologies: Angular, .NET Core, Docker, AWS

Cooperation model: Fix Bid

This MedTech project was created for clinics, hospitals, and their clients. Clinics may provide their content to clients and advertise their services while clients get health education via articles and videos.

Devox Software was responsible for creating user experience and user interface for web and tablet applications as well as developing the platform. Since the project was long-lasting, the client decided to hire a dedicated team. We created our library to take its components for the projects. In total, the design team created more than 100 screens while the development process took about 6 months.

RECRUITMENT PROCESS

RECRUITMENT KEY BENEFITS:

- We deliver the 1st relevant CV during 7 business days
- Every 3rd candidate receives an offer from the Client
- Average Time To Fill is 2-4 weeks
- Developer lifetime period is more than 18 months
- Strong regular performance team management
- External/Internal Weekly and Monthly professional trainings
- Hiring capacity up to 15 professionals per month

97% Developers pass a probation period
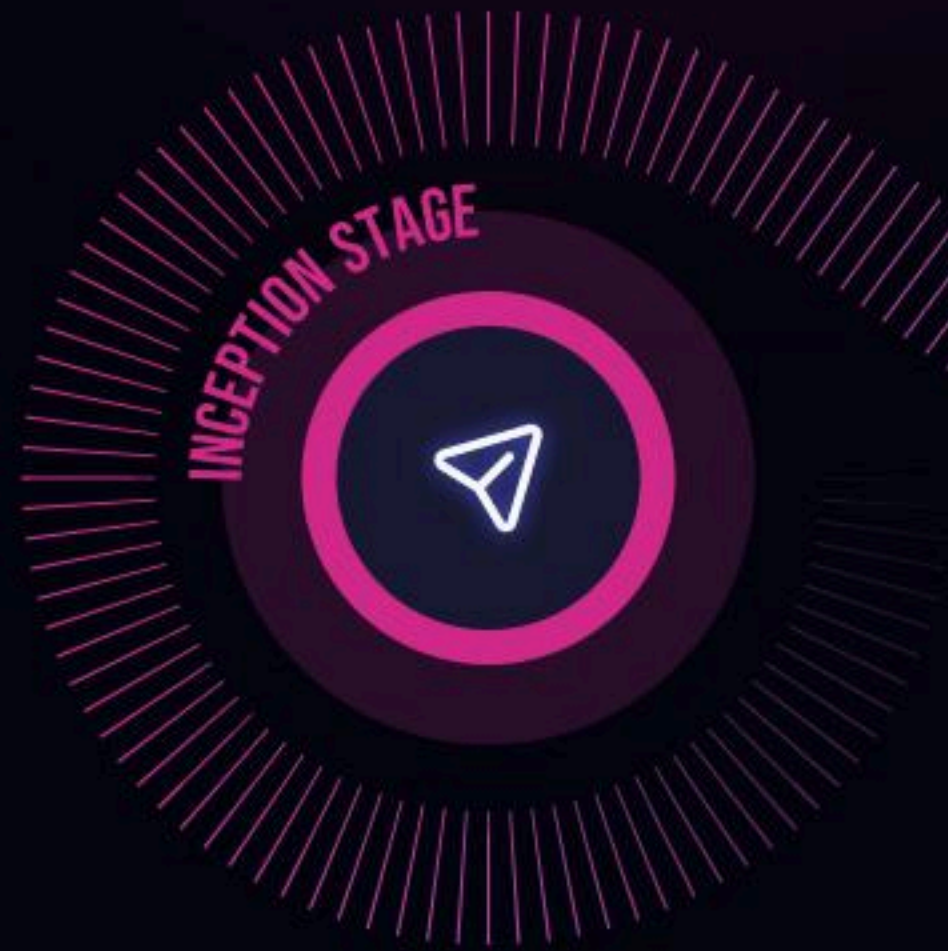

34% Every 3rd candidate receives an offer from the Client

	Role	Project domain	Time to Offer
	.Net Engineer	Fintech	2.5 weeks

Stage	Count
Contacted	209
CV Received	16
Prescreen	12

HOW WE CAN WORK TOGETHER

INCEPTION STAGE

POC IMPLEMENTATION OR TRANSITION STAGE

SUPPORT STAGE

ARCHITECTS, BUSINESS ANALYSTS AND CONSULTANTS INVOLVEMENT

- Initial contact, engagement
- Clarifying needs and setting priorities
- Knowledge transfer
- Defining the project, its purpose, expected goals and deliverables

PM, DEVELOPMENT TEAM AND ARCHITECTS INVOLVEMENT

- PoC Execution
- Migration or implementation planning
- IT infrastructure readiness assessment
- Architecture design
- Perform transformation projects
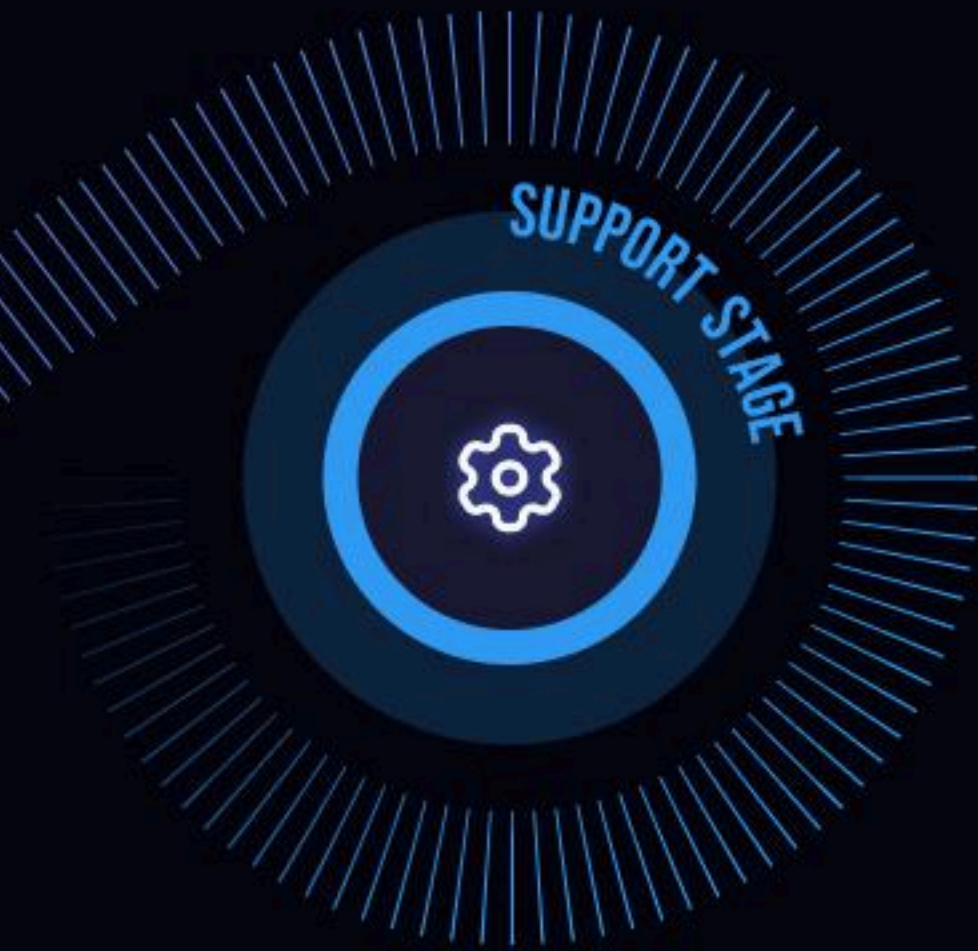

REMOTE SUPPORT TEAM OF ENGINEERS (1ST), 2ND AND 3RD LINE SUPPORT

- Application maintenance
- IT infrastructure Support and maintenance 24X7 or 5X8 with on call
- Increase customer satisfaction by keeping SLA
- New customers onboarding
- Initiating next products phase
